EDUCATION

Lucknow, UP	Amity University Uttar Pradesh	Fall 2021 – June 2025
-------------	--------------------------------	-----------------------

B. Tech in Computer Science and Engineering in CGPA: 7.28/10.00

Relevant Courses: Data Science, Computer Organization & Architecture, Generative-AI, Artificial intelligence, and Machine Learning.

SKILLS

Programming: C++, Python, Html, CSS, JavaScript

Soft skills: Creative Problem-Solving, Analytical Thinking, Communication skills

Database Management: SQL

Additional Skills: Data Cleaning, Data Processing, Exploratory Data Analysis (EDA), Data Prediction, Power BI, QA, Selenium

WORK EXPERIENCE

NEXUS INFO-

Data Analysis intern

- **Understanding Trends:** By analyzing historical data, analysts can identify trends and patterns that help organizations make informed predictions about future outcomes.
- **Decision Support:** Businesses rely on data analysis to make strategic decisions. Whether it's determining market demand, optimizing operations, or allocating resources, data-driven insights are invaluable.
- **Problem Solving:** Data analysts are problem solvers. They dig into data to uncover the root causes of issues and suggest actionable solutions.

PROJECTS

-
- **Data analytics and visualization on the Weather Data** (GitHub: <https://github.com/hoomanonl/Data-analyst-.git>)
Conducted analysis on weather data using python libraries. Took the dataset from Kaggle and done analysis on min temp, max temperature, and rainfall prediction using heatmaps and matplotlib.
 - **Twitter Sentiment Analysis** (GitHub: <https://github.com/hoomanonl/Twitter-sentiment-analysis.git>)
Conducted analysis on twitter sentiments using python pandas and numpy libraries. Took the sentiment data from Kaggle and fixed the missing values. Organized the positive and negative words using wordCloud. Made a research paper on this project.
 - **Healthcare Analysis for stroke, heart disease and others** (GitHub: <https://github.com/hoomanonl/Health-care-analysis.git>)
Conducted analysis on health care for strokes, heart disease and others based on their day-to-day life using python pandas and numpy libraries. I managed the missing values and plotted the graph, also used machine learning concept. I made a research paper on this.

ACHIEVEMENTS

-
- Google Developer Student Clubs Member.
 - Volunteered in a Road Safety Event Program.
